

Combo Jector

Cordless Gun for Auto Injection

Cordless Gun

for Auto Injection

INJECTOR

CORDLESS

Features

Turbo Suction
Reduce Pain, Minimize Loss

Precise Control
Depth, Dose, and Duration

Selectable Needle Type
1pin / 5pin / 9pin

Wide Compatibility
Skin Boosters, Fillers

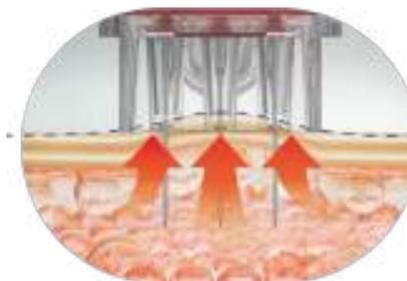

Intuitive Interface & Customization

- Designed with basic buttons to prevent **malfunction**, providing safe treatment environment
- Set the values per function, quick access available **through** short-cut key

Powerful suction capabilities

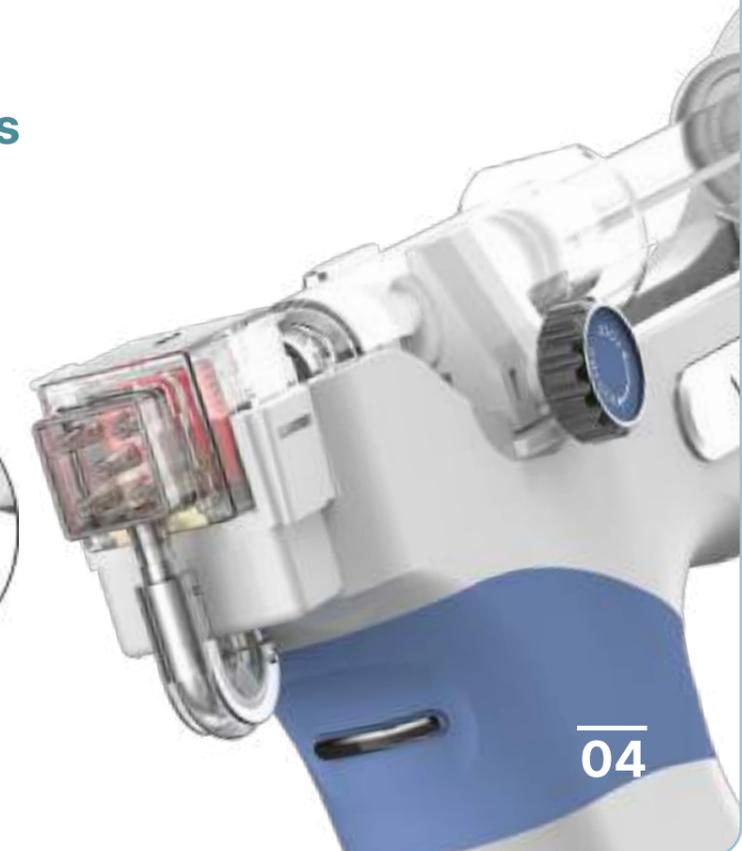

- Pain relief by skin - adherence
- **Minimize Loss**

Vacuum Technology

Suction filter

Selectable Needle & Wide Compatibility

- ✓ Compatible with most skin boosters
- ✓ Optimized for mesotherapy and PRP treatments

Needle selection based on treatment goals

Fast procedures tailored to clinical goals, with minimized patient discomfort

01 Injection 9Pin

Wide-area coverage, even dose distribution

02 Injection 5Pin

Wide-area access, effective on curved areas

03 Syringe

Targeted application on narrow zones

What is Mesotherapy Using Combo Jector?

Combo Jector introduces innovation to mesotherapy by providing a precision-controlled, minimally invasive method for delivering active compounds—such as nutrients, vitamins, and peptides—directly into the dermis.

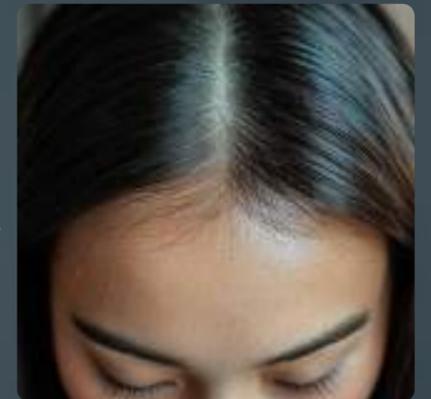

Widely adopted in early-stage anti-aging care, it enhances skin vitality, refines texture, and promotes deep hydration.

This approach optimizes both facial and scalp treatments by enhancing penetration and increasing bioavailability.

Who is it ideal for?

Combo Jector's mesotherapy solution is ideal for individuals seeking enhanced skin brightness, elasticity, and hydration. It is particularly well-suited for those addressing early signs of aging, pigmentation issues, or scalp concerns such as thinning hair—especially for patients who prefer non-surgical, downtime-free treatments with visible rejuvenation outcomes.

How does it work?

Utilizing controlled micro-injections, Combo Jector delivers regenerative compounds directly into the dermal layer—stimulating collagen synthesis, enhancing microcirculation, and supporting cellular turnover. The procedure is quick, comfortable, and precisely targeted.

What results can be expected?

Patients can typically expect enhanced skin tone, improved firmness, and increased moisture retention, accompanied by a visible reduction in signs of fatigue and hyperpigmentation. When administered to the scalp, the treatment aids in activating dormant hair follicles and enhancing overall scalp health. Results develop cumulatively over multiple sessions, delivering natural and long-lasting improvements.

Specification & Composition

Specification

MODEL	: Combo Jector
DEPTH	: 0.2mm ~ 5.0mm (Max.)
DIMENSION(mm)	: W250 × D250 × H200 mm
WEIGHT	: 1.0kg
INPUT	: AC220~240V、50/60Hz、0.5~0.3A
BATTERY	: Li-ion battery (3.7V DC / 3000mAh) zv
